Projects

Software Engineering

- Experimented with Django and React framework to try and create a finance record sheet, both of which were never fully completed
- The experience from working with both frameworks led me to work on my personal portfolio page created using Ruby on Rails with a React webpack
- Built confidence in software engineering and working with different frameworks

Telegram Bot

- Runs with Google Apps Script, records expenses as well as man hour
- The data recorded goes directly into an excel spreadsheet in Google Drive
- Learnt to use Google Apps Script with Google Spreadsheet as well as many functions within Google Spreadsheet to review the data collected

EDUCATION

Computer Science

Statistics

National University of Singapore

📅 August 2022 – July 2026

SKILLS

Leadership

Project Management

Programming

Ruby on Rails

React

Django

Python

PRIOR EDUCATION

Engineering Science, Ngee Ann Polytechnic

📅 April 2017 – March 2020

- Through my course of study I learnt about the basics of programming, data structures and algorithms, object oriented programming
- I also took an additional diploma in advanced engineering mathematics

PRIOR LEADERSHIP EXPERIENCE

Primer, Boys' Brigade 21st Singapore Company

📅 March 2017 – August 2020

- Conducted training and lessons regarding leadership and to fulfil curriculum requirements (e.g. Global Awareness, Total Defence, Outdoor Expedition)
- Planning as well as execution of camps ranging from training camps to outdoor expedition camps, played many roles ranging from conducting, logistics, finance, administration, food and risk management
